Industry

Healthcare

Organization Profile

MedAssets improves healthcare providers' margin and cash flow through revenue cycle and supply chain initiatives as well as decision support technology and services.

Situation

MedAssets currently uses over sixty applications to collect and report data for the Automated Backlog Solution (ABS) and they need to bring this solution into Sarbanes-Oxley compliance.

Business Solution

BAC provided a solution that will enable MedAssets to fully optimize the ABS solution.

Technology Deployed

- Microsoft Office 2007 Server
- SQL Server 2005
- PerformancePoint
- Visual Studio 2005

Since 1989, Blackstone & Cullen, Inc. has leveraged information technology to provide business solutions. Principal services include enterprise application integration, data warehousing, program office implementation, and custom application development.

MedAssets was using over sixty applications to collect and report data for the Automated Backlog Solution (ABS) and they needed to bring this solution into Sarbanes-Oxley compliance. The process for collecting this information and producing reports was slow and labor intensive. Specifically, the ABS was not optimized for reporting and the reports were created in a manual fashion by a team of financial analysts. The primary tool for this was Excel.

Solution

Blackstone & Cullen, Inc. worked closely with MedAssets to disseminate information as quickly as possible. BAC performed a detailed analysis of the MedAssets ERP solution, Microsoft CRM, ABS, data models, and current Microsoft Excel reports. From this analysis, BAC provided a Microsoft PerformancePoint based solution that enables MedAssets to fully compliant and comprehensive Project Backlog solution.

Benefits

BAC was able to create a "reporting friendly" data mart for MedAssets that allows flexible reporting capability. This saved MedAssets many man hours and eliminated duplicate data entry processes which forced consistency throughout the organization and created compliance with Sarbanes-Oxley.
